SKILLS

- C++, Java, Python, Swift
- HTML, (S)CSS, JS

- MongoDB, Express, ReactJS, Node.js
- Git, Terminal, VS Code, Open Source

EDUCATION

Graduating 05/2022   **Bachelor of Arts** | *CUNY – Hunter College, New York, NY*
- Computer Science
- Algorithms, Data Structures & Software Development

WORKS

07/2020 – 08/2020   **CoViz-19 (Web App)** | *MongoDB, Express, Node.js, ReactJS*
- A dashboard with all the current Covid-19 updates.
- Help users to visualize and interact with the Covid-19 data.
- Let the users post their thoughts regarding the pandemic.

12/2019 – 01/2020   **habit-app (iOS)** | *Swift, Core Data*
- Tracks the user's progress to make a new habit.
- Uses Apple's Core Data to save the user's tracking progress on the phone for later use.
- Allows the user to add new habit trackers or delete the old ones from the list.

03/2019 – 04/2019   **weather-app (iOS)** | *Swift, Core Location, Alamofire*
- Uses Dark Sky API to get the user's current weather data.
- Allows the user to search and get weather updates from anywhere around the globe.

EXPERIENCE

12/2020 – Present   **Quality Assurance Intern** | *Videri Inc., New York, NY*
- Test the web apps using Selenium and Webdriver IO to ensure they pass all the requirements before deployment.
- Troubleshoot any bugs or issues with on-production or post-production web apps.
- Write custom automation test scripts for maintenance and to reduce the possibilities of any failure.
- Ensure the performance & security of the web apps before deployment.
